

## CR300L-01LF 300mm Wafer Carrier

Pozzetta will protect your valuable products from particles, ESD damage, outgassed components, and high costs. Companies around the world trust Pozzetta to create secure environments for the semiconductor, electronics, and medical industries.

Dimensions	Features and Benefits	CR300L-01LF
<p>Capacity: 25</p> <p>Overall Size: 350mm (13.77in) x 217mm (8.54in) x 260mm (10.23in)</p> <p>D<sub>1</sub> Dimension – distance from the H-shaped end surface to the center line of the first pocket (SEMI Std): 25mm (.98in)</p> <p>Pocket Spacing – The distance between pocket center lines: 7mm (0.275in)</p> <p>Pocket Flat – The width of the pocket at its narrowest distance: 2mm (0.78in)</p>	<ul style="list-style-type: none"> <li>• Low profile design allows the greatest possible wafer exposure to increase cleaning and drying efficiency</li> <li>• Enhanced stability for horizontal wafer handling</li> </ul> <p><b>Material Description</b></p> <p>Perfluoroalkoxy (PFA) is a high purity process wafer carrier material with high heat resistance and outstanding chemical resistance.</p>
